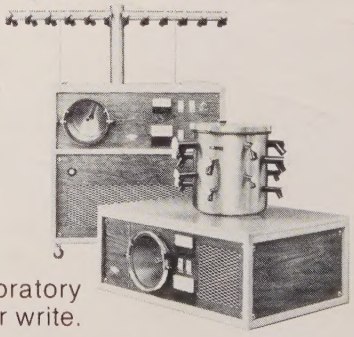
The standard in freeze drying.

Now there's a laboratory freeze dryer for all of your research or development needs.

Whether your requirements range from a single sample to mini-production 3 to 24 litres of ice capacity, Virtis has a precision freeze dryer that can save you time, space and money.

Virtis freeze dryers offer you a host of important features. Like smooth sided stainless steel condensers so that the ice plug can be removed quickly. The capacity to accept any standard chamber or manifold. Stainless steel tubular construction. Removable side panels. Hot gas quick defrost for fast melting. And more.



If you'd like to learn more about Virtis' freeze dryers for every laboratory application, please call or write.

Send for our free 48 page color brochure.
